2 x 4 Used as base for the pedal 34” long fits under left side of table on floor.

2.5 x 1 board for pedal 32” long fits on top of base.

Arm Collar Cut from 8.5” scrap 2 x 4

Slit In half

Use scroll saw to cut out openings 1.5” x 4.5”

Bolts to hold together on arm

Eye Bolt

Side View of the pedal and base

All the wood materials I used were scrap. I’m attempting to show anything to scale here, just a general impression of how the apparatus is constructed and set up. You might have to make modifications to fit your needs.
