THE INITIAL CAR
(c)2020 baggetta.com

Initials cut from 2x4 wood about 1.5” thick and mounted on a small base which will be glued to the top of the base.

2 1/4” dowels for the wheels about 3” long.

6.5” x 1.75” x 1.5” blank cut from a 2 x 4
Use as the base for the car

Two 9/32” holes drilled through the base.

Use a 3” hole drill to make the wheels. They should have a 1/4” dowel hole drilled on center.
For a fancier wheel you can cut out the pattern above on 1/2” thick wood.
